## **Shareholder Update: – Commencement of Bamboo Creek Vat Gold Leaching**

Management at Bamboo Creek has today advised that 1.66g/t gold was recovered from the 1.425 tonnes (+180 microns to -3mm) Trial Vat Leach of Kitchener Low Grade ore. Leaching began on December 13, 2019 and was completed January 18, 2020. Gold was extracted from the Trial Vat Leach ore using the Elazac Leach Process (See Figure 1). The Trial Vat Leach is continuing to measure the expected fortnightly gold recovery from the Vat Leach.

**Figure 1: Vat Leach Trial processing 1.425t of '+180 microns to -3mm' ore from Bamboo Creek Vat**

'Plumbing' for the Bamboo Creek Vat Leach has been completed and leaching of gold will commence this week. Gold production is expected in about two weeks. The Bamboo Creek Vat contains about 28,000 tonnes of crushed Kitchener Low Grade ore.

It is anticipated that the Bamboo Creek Vat will recover gold continuously over approximate 14 day cycles.
